GLOBAL LAYOUT

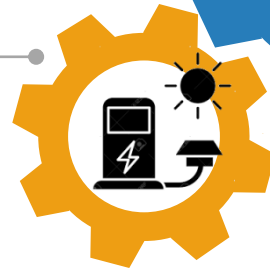

Automotive

We are IATF16949 certified and build Onboard Diagnostics Boxes, Camera's, driving recorders to many customized electronic solutions.

Healthcare

With our TÜV ISO13485 medical certificate we are able to produce medical devices used both at home and in hospital/clinical environments.

Energy - Industrial

From a simple PCBA to complete EV (Fast)Charging stations, Solar panels, Power inverters, LED lighting, etc. As a valued lifecycle partner, a lot of our customers rely on our extensive know-how and experience.

Smart Home

From smart meters, speakers, thermostats, lighting, Internet of Things, routers, tablets to anything smarter than us.
Your ideas, and we can help you make it happen.

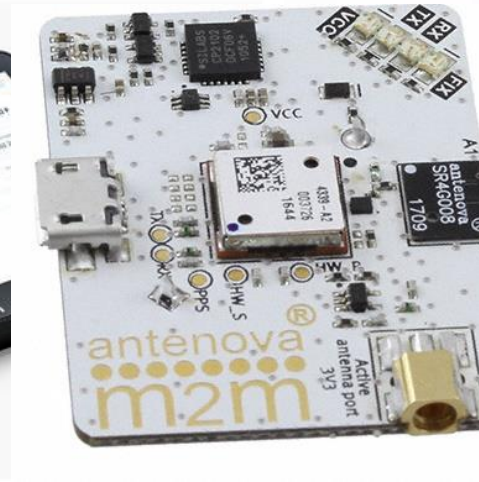

Communication & Wireless

From building over 70 million mobile phones/year to all types of wireless products . We can do this for you.

Other

There are many industries that are special and new, like "robotics" or energy storage solutions. DBG welcomes new partners with bright ideas and can help you with our engineering strengths and body of knowledge, know-how and domain expertise to develop, build and deploy your new devices and solutions.
